

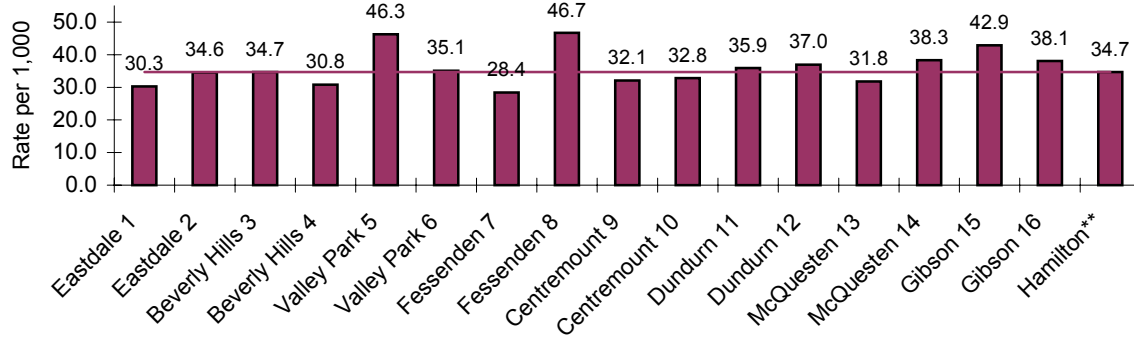

**Figure 10b**  
**CCAC Clients per 1,000 Population by Neighbourhood, 2001,**  
**Age and Sex Standardized\***

\* The neighbourhood rate is standardized by age and sex using the Hamilton population as the standard for age-sex controlled comparisons. That is, the age-sex standardized rate is the rate that would result if the neighbourhood population had the same age-sex distribution as Hamilton.

\*\* horizontal line marks City of Hamilton value
